RECTIV 0.4% OINTMENT FOR THE TREATMENT OF ANAL FISSURES

Rectiv Ointment can be used as a medical treatment for Anal Fissure.

Using a covered finger (covered with a finger cot, plastic wrap or baggie), apply one inch of Rectiv Ointment inside the anus every 12 hours. You may use the dosing guide printed on the side of the box containing the Rectiv Ointment for the correct measurement.

If you experience headache, you may take 650mg of Acetaminophen 30 minutes before applying each dosage of the Rectiv Ointment.

If you experience light-headedness or dizziness you must **IMMEDIATELY** remove the ointment from the anal opening. **STOP** any further usage and notify the office for further instructions.

You must wash your hands/fingers after every application.
